

The Defense Medical Readiness Training Institute
is proud to bring the
**Federal Coordinating Center &
Primary Receiving Center
Basic Operations Course (FCC/PRC)**

***San Antonio, TX
April 9-11, 2013***

- ❖ ***You have been assigned as your unit's FCC/PRC Coordinator. Now what?***
 - Through lectures by Subject Matter Experts (SMEs), facilitated discussions, and interactive exercises, you will learn to effectively implement a PRC/FCC program management and patient reception operation that enhances the response to a public health/military medical emergency in accordance with the National Incident Management System (NIMS).
- ❖ ***What aspects of the FCC/PRC program will the course cover?***
 - Planning and Operational aspects that are critical to successful coordination with local, State, and Federal agencies
 - Critical elements to program activation and available resources, application of the Incident Command System (ICS) structure to FCC/PRC operations, and logistical considerations
 - Patient movement planning and operation coordination between DoD and Federal Patient Evacuation through the use of Aeromedical Evacuation (AE), Joint Patient Movement Expeditionary System (JPMES), and special teams.
 - Utilization of TRAC2ES, Joint Patient Assessment Tracking System (JPATS)
 - Applicable medical regulations, management of medical information, role of Service Assessment Teams (SAT), and discussion on funding and reimbursement process
- ❖ ***Do I qualify?*** Open to Active Duty, Reserve, Guard, US Public Health Service Department of Veterans Affairs, and US Department of Health & Human Services members assigned as FCC/PRC coordinators and alternates. If space available, other FCC/PRC staff involved in management and military patient reception operations, to include: Headquarters personnel, FCC/PRC Directors, physicians, nurses, administrators, social workers, as well as regional emergency medical planners and metropolitan health system personnel designated to support FCC/PRC operations.
- ❖ ***Course Prerequisites:*** Prior to attending the course, please complete the following:
 - The **TRANSCOM Regulating and Command & Control Evacuation System (TRAC2ES) Web Based Training (WBT) Course**
 - **FEMA IS-100 "Incident Command System" Independent Study Course**
 - **FEMA IS-120 "Introduction to Exercises" Independent Study Course**
